ABOUT ME

I am two months away from completing my B.Sc. in Software Engineering. During my military service, I developed and maintained mission-critical mainframe applications, contributed to system-migration efforts, and implemented complex business rules. I now build backend and Android projects using modern technologies, with a focus on practical and reliable solutions. I bring strong ownership, adaptability, and a collaborative approach to solving complex problems.

SKILLS

Java, Kotlin, Python, C#, JavaScript, ASP.NET, .NET, Android SDK, Jetpack Compose, MVVM, MVI, Data Binding, Room, Retrofit, Firebase, On-Device AI, REST APIs, JSON, Spring Boot, Node.js, Android Studio, IntelliJ IDEA, Eclipse, Git, Gradle, Maven, Docker, Jira, TensorFlow, Client-Server Architecture, Ngrok

Languages: Hebrew (Native), English (Fluent), Arabic (Conversational)

EDUCATION

2022 - 2026, **Bachelor Of Engineering**, Afeka Tel Aviv Academic College Of Engineering

- Majoring in User Interfaces & Related Software Development

- Coursework: Integrative Software Engineering (100), User Interfaces - Security and Privacy (100), Mobile Applications (99), Object-Oriented Programming (93), Databases (93), Software Engineering Methods (90)

Certifications & Training:

[Java Network Programming](#) | [Android 16 Part 1](#) | [Android 16 Part 2](#) | [Master On-Device ML & AI for Mobile Apps](#)

PROJECTS

ANDROID SECURITY RESEARCH APP (EDUCATIONAL)

- Developed an Android security research app with a Node.js backend to demonstrate how sensitive mobile data can be exposed and highlight the importance of secure mobile design.
- Implemented encrypted data handling and covert client-server communication within an authorized research environment to examine common mobile security risks and to explore defensive detection methods.

AIR CONDITIONING MANAGEMENT SYSTEM

- Contributed to a team-based Spring Boot platform as a system architect and DevOps team member, centralizing air-conditioning monitoring and control, to give users clearer visibility and easier management of connected units.
- Designed and coded the backend logic and participated in system testing to support reliable functionality, consistent behavior, and a dependable user experience.

GIT-GIT

- Developed an Android learning game that turns Git practice into guided, terminal-style challenges, helping users build practical confidence before working with real repositories and team projects.
- Built a simulated Git engine, interactive branch visualizer, world-based progression system, and an on-device Gemma-powered AI assistant to help users understand commits, branches, merges, and mistake recovery in a safe, engaging environment.

WORK EXPERIENCE

2021 - 2022, **Mainframe Operator**, Mizrahi Tefahot Bank - The Technological Division

- Monitored and resolved incidents across the bank's central mainframe production and test environments, supporting stable, reliable, and continuous operations for the bank's customers and inner departments.

MILITARY SERVICE

2018 - 2021, **Mainframe Developer**, J6 & Cyber Defense Directorate - SHAHAR Unit, Staff Sergeant (Samal Rishon)

- Developed and maintained mission-critical software for the IDF's central workforce management system, supporting accurate, reliable, and continuous personnel operations across the organization.
- Collaborated with military and civilian teams to translate operational requirements into practical system changes, improving workflows between connected systems users, and stakeholders across multiple units.
- Helped maintain workforce-system availability during alerts and operational incidents, enabling timely support for military operations and personnel while resolving issues within minutes to two hours, depending on severity.

VOLUNTEERING & HOBBIES

- Volunteer several hours each week with a team developing a mobile app that promotes well-being and productivity.
- Amateur automotive mechanic with hands-on experience diagnosing and fixing car-related problems.
- Enjoy repairing electronics and taking on practical handyman and home-improvement DIY projects.
