EDUCATION

AFEKA, TEL AVIV ACADEMIC COLLEGE OF ENGINEERING

TEL AVIV, ISRAEL

Bachelor of Engineering

2022 - 2026

Major in User Interfaces & Related Software Development

Relevant Coursework: Software Engineering; Mobile App Development; Algorithms; Artificial Intelligence

PERSONAL & COLLEGE PROJECTS

ENCRYPTION & STEALTH KEYLOGGER SYSTEM

- Developed an Android security research application with Node.js backend integration.
- Implemented encrypted data handling and secure transmission while demonstrating information-security risks.

PERSONAL MEDIA STREAMING APP

- Built an Android streaming application for movies, TV series, and live news channels.
- Optimized UI performance and media delivery for a smoother user experience.

AIR CONDITIONING MANAGEMENT SYSTEM

- Architected and coded a monolithic Spring Boot system for monitoring and controlling AC units as a system engineer.
- Focused on system architecture, backend logic, and team-based software development.
- Containerized the database with Docker to simplify setup, standardize environments, and support smoother deployment.

GIT-GIT

- Created an Android educational game for learning Git through interactive terminal-style challenges.
- Integrated on-device AI support, branch visualization, and world-based progression.

WORK EXPERIENCE

MIZRAHI TEFAHOT BANK - TECHNOLOGICAL DIVISION

Tel Aviv, ISRAEL

Mainframe Operator

2021 - 2022

- Monitored and resolved production and test environment issues within the bank's central mainframe system, ensuring 99%+ availability.
- Collaborated with internal departments and external teams to improve system performance, reliability, and operational continuity.
- Coordinated emergency recovery procedures for customer credit-card details in about 10 weekly cases, reducing operational impact and helping protect the bank's reputation.
- Streamlined incident management processes, reducing downtime risk and supporting stable day-to-day operations, leading to 99% reduction in downtime incidents.

MILITARY SERVICE

IDF

ISRAEL

Mainframe Developer

2018 - 2021

- Developed and maintained mission-critical code for the IDF's central workforce management system, contributing to a 99.9% uptime.
- Collaborated with 3-5 cross-functional teams across military and civilian entities to align operational needs with technical constraints, streamlining system changes.
- Ensured the operation and availability of workforce systems during alert conditions and incidents, achieving issue resolution within minutes to 2 hours depending on severity.
- Guided and motivated new developers in resolving critical system incidents, decreasing errors attributed to new team members by 20%.
- Improved knowledge transfer for new developers through a shared team wiki, strengthening onboarding, team readiness, and operational continuity.

ADDITIONAL

Technical Skills: Java, Kotlin, Python, PL/I, C#, ASP.NET, .NET, Android SDK, Jetpack Compose, MVVM, MVI, Data Binding, Room, Retrofit, Firebase, REST APIs, JSON, Spring Boot, Node.js, IBM z/OS, TSO/ISPF, JCL, Android Studio, IntelliJ IDEA, Eclipse, Git, Gradle, Docker, JIRA, TensorFlow, Client-Server Architecture,

Languages: Fluent in Hebrew, English; Conversational Proficiency in Arabic

Certifications & Training:

[Java Network Programming](#) | [Android 16 Part 1](#) | [Android 16 Part 2](#) | [Master On-Device ML & AI for Mobile Apps](#)
